《Development in the area around Kumamoto Station》

With stations as bases, we will implement new city-building initiatives to create communities that offer a wide range of functions — such as station buildings, offices, hotels, condominiums — and which are places where people want to live, work, and visit.

For the station building, drawing on the nature of Kumamoto as a theme, we will build a “3D garden of water and greenery and a rooftop terrace,” which will be the symbol of the community.

《Miyazaki Station west entrance development》

We will implement joint development of the station building together with the Miyakoh group, implement large-scale renovation underneath the elevated tracks at the station, and enhance the station square in cooperation with government initiatives. In this way, we will strive to help create a new lively atmosphere with Miyazaki Station as a base. In cooperation with people in the local community, we will extend the lively atmosphere around the new station to the greater community.
